

The Blurb

Volume 51 Number 6

Public Service Since 1949

JUNE 2001

The Blurb is published monthly by, and for, the members of **The PHIL-MONT MOBILE RADIO CLUB, INC.** whose purpose is to promote Amateur Radio in general, and Mobile Radio in particular. Copying and quoting is permitted with a credit line. We gladly exchange publications with other amateur radio clubs. Requests should be sent to the Editor. Subscriptions are available to non-members for \$10, addressed to the Treasurer. The club meets at 7:30 PM on the *second* non-holiday Wednesday of every month at **The Franklin Institute Science Museum**, Benjamin Franklin Parkway at 20th Street, Philadelphia. Enter from Winter Street or the parking garage on 21st street. **ALL VISITORS ARE WELCOME!**
Amateur Radio License Examinations are held on the *first* non-holiday Thursday of every month at The Franklin Institute Science Museum--- registration finishes at 6 p.m. doors close at 6:30 PM-**SHARP!**

Net Schedule

Thursday CW Practice Net at 20:00— 147.030MHz FM (NOT DURING JUNE, JULY AND AUGUST)

Sunday morning 2 Meter Net at 09:30 — 147.030 Mhz FM

Sunday morning "10-on-10" Net at 10:00 —28.393 Mhz SSB (+ or - for QRM)

Sunday morning 75 meter Net at 10:20 — 3.993 MHzSSB

ARRL EXECUTIVE COMMITTEE REVIEWS PRELIMINARY 5 MHz BAND PETITION

The ARRL Executive Committee has reviewed a preliminary draft Petition for Rule Making seeking a new US ham band in the vicinity of 5 MHz. Experimental operation at 5 MHz under a license issued to the ARRL has been going on since 1999. Participants in the ARRL WA2XSX experimental operation have established that an allocation at 5 MHz could improve emergency communication capabilities by filling the gap between 80 and 40 meters. On a motion from Southwestern Division Director Fried Heyn, WA6WZO, the EC agreed that the petition should seek a domestic secondary amateur allocation around 5 MHz with a bandwidth of 150 kHz. Executive Committee members will review the completed draft petition before it's filed with the FCC, possibly before the next ARRL Board meeting in July.

An amateur allocation in the vicinity of 5 MHz long has been an objective of the International Amateur Radio Union. The IARU's Administrative Council has approved a goal of "a narrow allocation, even on a shared basis in the vicinity of 5 MHz." Winning an allocation at 5 MHz--even on a domestic basis could take several years. Securing an international allocation will be more difficult and take even longer. Consideration of an allocation at 5 MHz is not on the agenda for WRC-03 nor on the preliminary agenda for WRC-05/06.

A review of FCC-related issues dominated the May 5 Executive Committee session in Dallas. In other matters, the Executive Committee was told that an FCC Notice of Proposed Rule Making still is expected soon in response to the ARRL's petition, RM-9404, seeking Amateur Radio access to the low-frequency spectrum. Filed in late 1998, the ARRL petition asks the FCC to establish LF allocations in the vicinity of 136 kHz and between 160 and 190 kHz. ARRL General Counsel Chris Imlay, W3KD, also told the Committee that the ARRL's Application for Review that seeks to clarify the FCC's PRB-1 limited preemption policy with respect to amateur antennas is pending before the full Commission. The ARRL wants the full Commission to review--and reverse--an FCC

(continued on Page 8)

The PREZ SEZ

SOME HISTORY OF OUR FIELD DAY SITE

Fort Washington State Park consists of 493 acres in eastern Montgomery County. The park lies between the towns of Fort Washington and Flourtown along the Bethlehem Pike. It is approximately two miles from PA Turnpike exit 26.

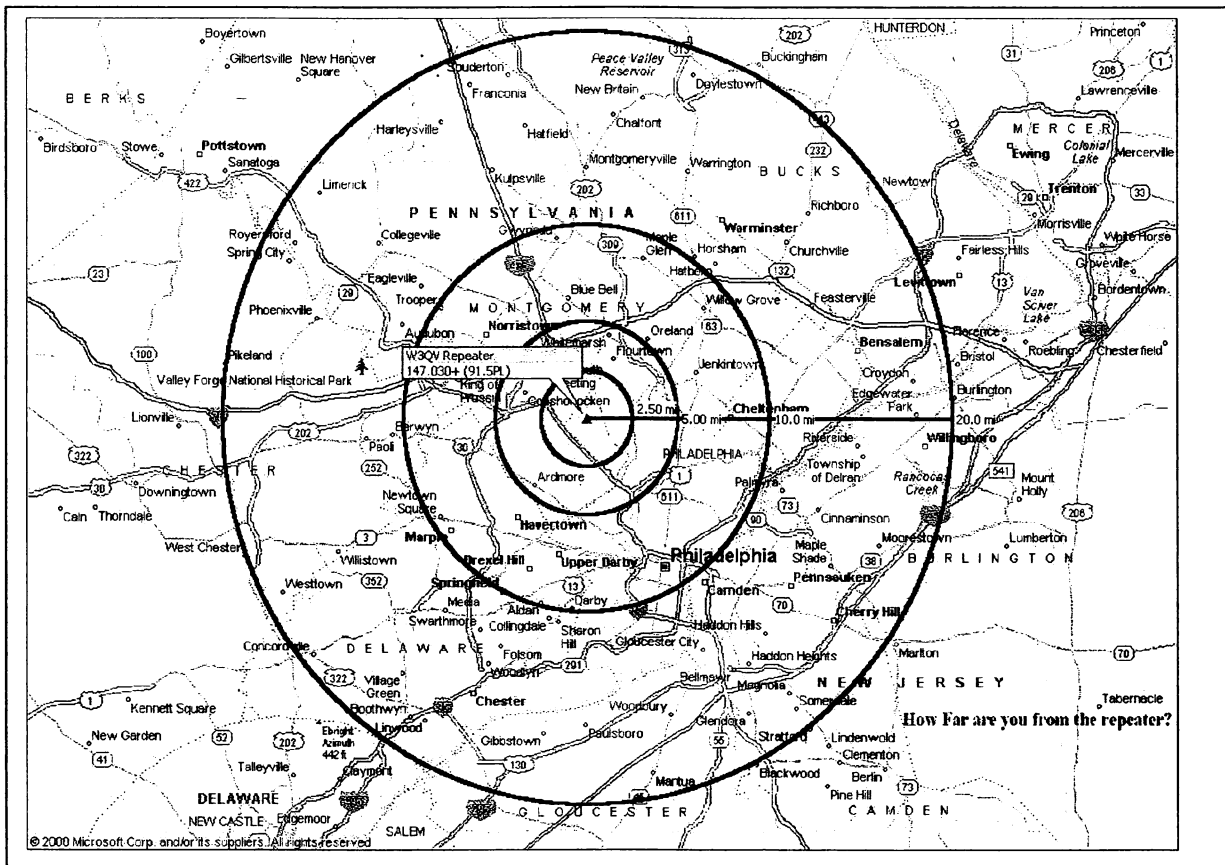

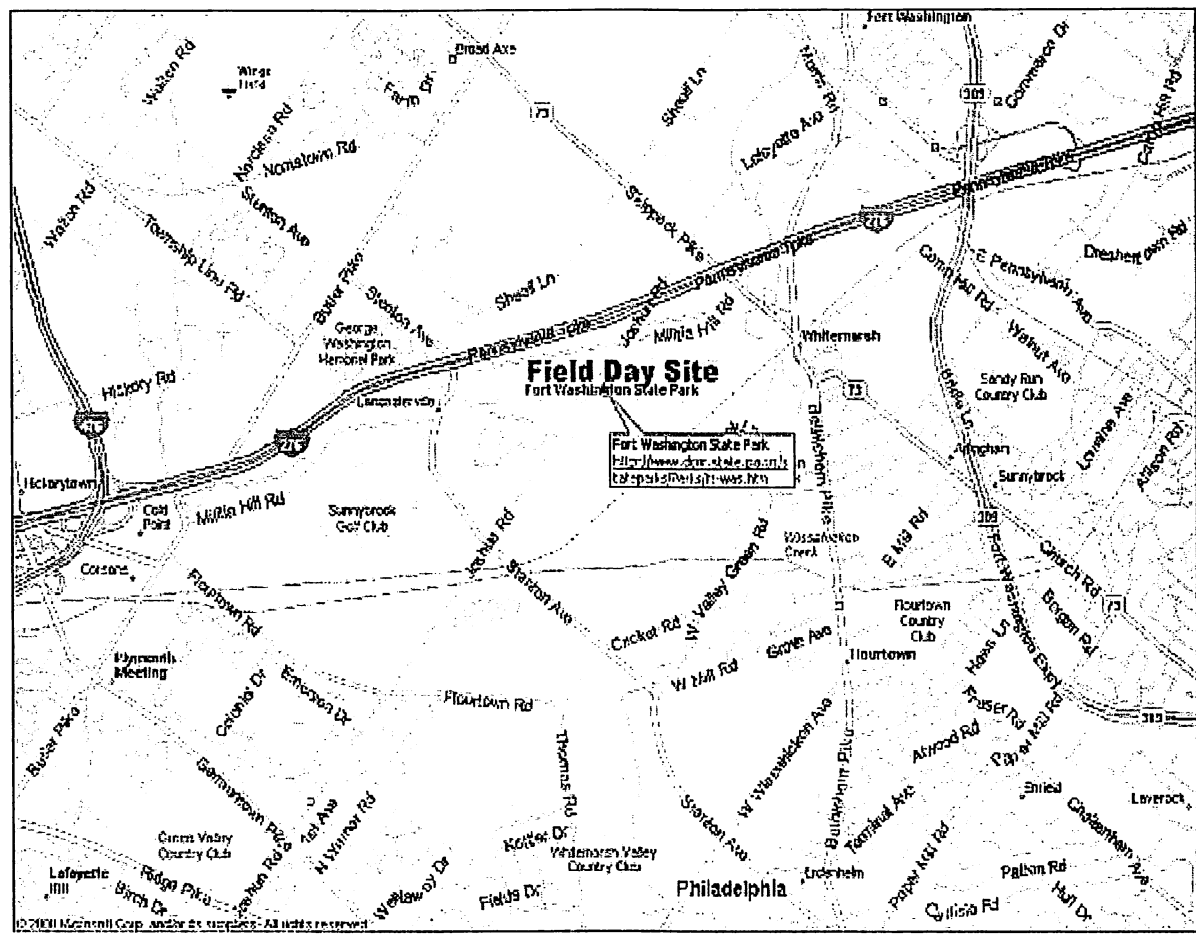

Fort Washington State Park and the community of Fort Washington take their name from the fort built here by soldiers of the American Revolution in the fall of 1777. Whitemarsh, as the area was called then, was the scene of the encampment of 12,000 soldiers of General Washington's army from November 2 until December 11, 1777.

Following the unsuccessful battle of Germantown, Washington chose the heights of the Whitemarsh Valley as an easily defendable position. From here he pondered the possibility of launching an attack against General Howe's British army in Philadelphia.

Although Washington decided against an attack, the British marched out from Philadelphia on December 5 to try to engage the Americans in battle. Because of Washington's strong position, only local skirmishes took place. After much marching back and forth, Howe led his army back to Philadelphia on December 8.

Knowing his poorly clad men needed better quarters, and also to protect the iron forges and foundries in the Schuylkill Valley, Washington left Whitemarsh on December 11, 1777, and marched the Continental Army to Valley Forge. There the American spirit had its first rendezvous with destiny.

Although Fort Washington State Park is beyond the boundaries of Philadelphia, the city's famous Fairmount Park Commission began acquiring land here in the early 1920s. The commission, with the assistance of the Secretary of the Pennsylvania Department of Forests and Waters, administered the park until 1953 when an Act by the State Legislature turned the park over to the former Department of Forests and Waters, now the Department of Conservation and Natural Resources

FRED RICE, WA3KIO-SECRETARY.....

MAY DIRECTOR'S MEETING

Bill, W3AOK, hosted the May 2 meeting. In attendance were George W3PXY, Mike K2BN, Dick W3RM, Al W3STW, Steve WU3I, Ed KB3IV, Ted KB3CYE, Jim W3BBB, Gene N3XKE and Fred WA3KIO. Mike K2BN: April is not an active month. Most dues collection is done.

Everything is on target. A discussion was held on the merits, pro and con on an electronic Blurb. An experiment may be tried. Ed KB3IV: Nets are OK, all are covered. Jackets had a positive response. More about them in the next Blurb. Up and coming programs were discussed. Al W3STW has made up a list of equipment at W3AA. Jim W3BBB: There is planned antenna work to be done on the 2 meter repeater. Jim will get word on when the antenna people can do it. The new 440 transmitter will be on the way when schedules permit. Steve WU3I: An R-7 antenna was purchased for W3AA. There is still the receive pre-amp for 440 satellite to be installed. Ted N3OWM is dealing with the feasibility of getting an Ethernet line into the station. The intention is being able to get satellite keys bulletins and our own e-mail. Next month will mark the 50th anniversary of W3AA. There are up and coming plans for a special event station at W3AA. Field Day: the deadline has passed for shirts and pins. We have 2 new antennas for 10 and 20 meters. Steve would like to see more operators.

The meeting was adjourned. Thanks to Bill W3AOK for hosting the meeting at his job site

GENERAL MEETING 5/09/01

Bill, W3AOK called the meeting to order. Charlye, K3CJ reported 13 members in attendance. Ed KB3IV described the new lightweight club jackets. They will be navy blue in color with the logo on the front and the name and call embroidered. The price is not determined yet but should be the same for small, medium, large and extra large. 2x and 3x will be additional. There will be more info in the next Blurb and on the repeater. Steve WU3I reported that we now have an R7 antenna on the Omni. The 570 is still out for repair. Field Day is progressing. Steve will contact the park to confirm our schedule with them. The menu will be in next months Blurb. We may need a 75 meter band captain. Contact Steve if you can help. ARRL shirts and pins have been ordered. Ted N3OWM reported that the Battleship New Jersey Amateur Radio Station is looking for volunteers. Right now, they are looking for carpenters and electricians. The station should be open to the public by Labor Day. For details or information, contact Ted. The meeting was adjourned and turned over to Fred, WA3KIO and his presentation about digital amateur modes.

GET WELL REAL SOON

I'm sure you have all noticed the lack of professionalism that is normally exhibited in this Award Winning Publication.

Unfortunately, our very capable editor, Dean Spare, N3TAL, is, as of this writing in the hospital.

So, in spite of all the noise I made on 147.03, no one else has volunteered to do it, I won the job by default..

Please Dean, GET WELL REAL SOON...I'm retired and don't need another job!
de WB3KOJ

On Friday May 4 I installed a new (to us) Cushcraft R7 on the roof for the TenTec OmniVI. The look good on the bands 40 is very sharp. Should work well.
I had the pleasure of meeting our new Volunteer Coordinator on Friday May 4, here is a copy of a mailed to volunteers and her picture.

Dear Volunteers,

I want to take this opportunity and introduce myself. My name is Jamie Collier and I am the new Director of Volunteer Programs at the Franklin Institute (the new Bobbie!). I began my new position on April 16th and have had the opportunity to meet with many of you. Every volunteer has greeted me with overwhelming kindness and I look forward to meeting all of you in the near future.

I joined the Franklin Institute after five years with JACS, Inc., a national support service contractor the United States Department of Labor's Job Corps Program. At JACS, I served as Regional Director and was responsible for recruiting, training, and supervising over 400 volunteers throughout a several state service area. Prior to JACS, I worked for the Big Brothers Big Sisters Association of Philadelphia and St. Mary's Villa for Children. Born and raised in Abington, PA, I currently reside in Lansdown with my husband Jay and cat Phoebe. I am a graduate of Abington Senior High School and have a Bachelor of Arts degree in Psychology from Duquesne University.

My goal is to strengthen the volunteer program at the Franklin Institute. I have been so impressed with the volunteers here who tirelessly give their time and expertise. It is an honor to work with such amazing people and I hope to make a positive impact on the volunteer department and the entire Institute.

Please, stop by the Volunteer Office to visit me, or feel free to contact me by telephone at (215) 448-1163. Your ideas and suggestions are always welcome.

The grand opening of the KidScience Exhibit is Saturday, May 19th. If you would be interested in helping out during this opening weekend extravaganza, simply contact the volunteer office. Lastly, the Customer Service Training Series will begin in May. These sessions have been designed to help staff and volunteers provide top-customer service to visitors of the Institute. Please contact the volunteer office for training dates and times.

FIELD DAY

Ok here we go gang this is the home stretch. One more meeting and then the big weekend. Joann is looking through the cookbooks as I type this so the menu will be at the end. We are set with all aspects as I see it. I have 22 people on the list for the meals and they are listed here: WU3I N3FTC W3RM N3MT N3KQH KE3QB WA3NSP WB0CPR W3AOK WA3KIO K3XS NG3P N3XKE N3XKE-1 N3TAL N3OWM KB3CYE W7MM W3UI K3DTC K3DTC-1 & 2. If your call is not listed and you want to eat, please let me know. If you are not included on my list on the weekend, you will eat last!!!

I still need a Portable Pack setup as defined by the FD rules or an APRS setup for 100 Bonus points. If you can help please contact WU3I.

OK here is the menu: **Saturday Lunch:** Hot Dogs, Hamburgers, Ice Tea **Saturday Dinner:** Chicken Chilli, Rice, Ice Tea **Thru the Night:** Coffee & Snacks **Sunday Breakfast:** French toast, Sausages, Coffee & Juice **Sunday Lunch:** Hot Dogs Hamburgers, Iced Tea.

If you have special Dietary Requirements please plan on attending to them yourself. I will be running a Field Kitchen with emphasis on the Field.

We can still use more operators and would be glad to have you, if only for a few hours. Stop by if you can.

I will be arriving to the site at Fort Washington State park 2PM on Friday to start assembling the antennas, towers and kitchen. Any help would be appreciated.

The Field Day Shirts and Pins will be handed out at the June Meeting.

Steve WU3I - Field Day Coordinator

186th Monthly Phil-Mont VE Test Session

Statistics for May, 2001

Six (6) candidates took Six (6) elements. We had Two (2) new amateurs & Two (2) upgrades.

The VE Team was chaired by Dusty Rhoads (ND3Q)
Session Examiners : Carol Hutkin, K2BL; William Palmer, W3ELN; Mike Morgan, W7MM; Jeff Kerber, N3VE; Jim McCloskey, NS3Y; Bob Freer, W3YLT

Upcoming Exam Sessions:
June 7, July 5, August 2

VE EXAMINATION SITES

Confirm all information, in advance, with the contact person. Licensed applicants must bring the original, and one photocopy of their license. All applicants including children, must show two other types of ID. Bring the original, and a copy of any Certificate of Successful Completion to prove current status. The ARRL VEC's 2001 test fee is \$10.00.

THE FRANKLIN INSTITUTE -Monthly,
First Thursday -Dusty Rhoads, ND3Q 215-879-0505, day. 215-448-1139 - 24-hours.
Doors open at 6PM and close sharply at 6:30PM.

BELLMAWR, NEW JERSEY
Diane Nafis, 856-227-6281. Testing is the third Thursday of the month at 6:30 PM. They meet at the Bellmawr Municipal Complex, Browning Rd. and Lewis Ave., one block off Black Horse Pike, Route 168.

Kachina Exits the Amateur Radio, HF Market
NEWINGTON, CT, May 24, 2001-Kachina-which made a big splash at the 1997 Dayton Hamvention when it introduced its then-revolutionary 505DSP PC-controlled Amateur Radio transceiver-is leaving the ham radio market. Company Vice President Cameron Earnshaw said Kachina will discontinue production and marketing of the 505DSP, its only ham product, and all other HF radio products and accessories, effective today. Kachina was absent from Dayton Hamvention this year.

"As you may know, many of the top management of Kachina are hams, so this has not been an easy decision to make," Earnshaw said in a statement released to several Internet newsgroups. "However, given the reduced worldwide demand for amateur radio in general, and HF radio in particular, it seems the only sensible choice for us to make."

Earnshaw blamed "the slowdown in Amateur Radio in general, and HF radio in particular" for the company's decision to exit the HF market. "Any radio selling for over \$1000 is a pretty hard sell these days, as I think just about any manufacturer will verify for you," he said. Earnshaw said he did not think the PC-controlled 505DSP was too ahead of its time for the amateur community to accept, although the company initially did offer an external tuning knob as a concession to more traditional users.

The Kachina 505DSP was the first amateur transceiver designed solely for control via a personal computer. At the time it was reviewed in QST (see "Product Review," QST, May 1998), the 505DSP retailed for \$2239 including the built-in automatic antenna tuner. The Kachina 505DSP is listed for \$1800 in the latest AES catalog with a note indicating that it would not be available once current supplies were exhausted.

Earnshaw said that the company knew it was in for "an uphill battle" even before the 505DSP went into production, when it learned that one large retailer had sold only 25 units of "a very popular Japanese model"

over a five or six-month period.

"Unfortunately, the 505DSP was too expensive to produce," he told ARRL. "For that we have only ourselves to blame. Performance costs money, but you really limit your sales when you cross that \$1000-\$1200 mark."

US manufacturer Ten-Tec followed Kachina's lead with the bargain-priced (\$895) Pegasus PC-controlled transceiver. Earnshaw said a side-by-side comparison of the Pegasus and the 505DSP will demonstrate "what the extra money buys you," but he said the average buyer these days is more concerned with price.

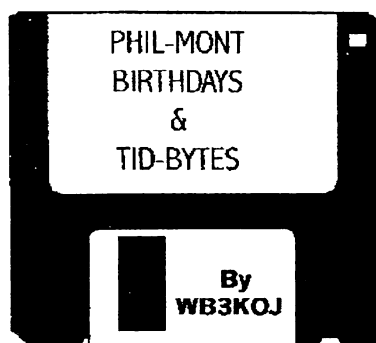

"Strictly from a marketing standpoint, I think Ten-Tec's approach is more likely to be successful," he said. "Even so, even modestly priced radios have now become so complex, that it requires a team of engineers to design and support a product. You now need RF engineers, software engineers and people who specialize in both digital and analog circuits. That's a lot of overhead to recoup in a soft market." Earnshaw said he does not know how the top Japanese manufacturers continue to produce and market top-end Amateur Radio gear and suggested they do so "out of a labor of love, supporting the losses from other more-profitable ventures."

"Unfortunately, we do not have the resources of a Kenwood or Yaesu, and simply cannot afford to support an unprofitable product line indefinitely," he said. Earnshaw said Kachina will remain in business in Arizona--as it has been for some 25 years--and will concentrate on its Swift Wireless line of broadband wireless Internet products and services. Swift Wireless operates a wireless Internet service in several Arizona communities and provides turn-key services to other ISPs throughout the Southwest.

Kachina will continue to provide service and spare parts for all Kachina HF radio products for the foreseeable future and will honor all factory warranties through the duration of the warranty period.

Amateur Radio products remaining in Kachina's inventory "will be made available through our Web site at clearance

staff decision declining to extend PRB-1 coverage to include CC&Rs--covenants, conditions and restrictions. The EC agreed to request an en banc presentation to the full FCC this fall, after new Commission appointees have been seated.

The Committee also was told that favorable FCC action is anticipated on a petition seeking to upgrade Amateur Radio's status from secondary to primary at 2400 to 2402 MHz. The ARRL recently renewed a longstanding request that the FCC elevate Amateur Radio from secondary to primary at 2300 to 2305 MHz. The minutes of the ARRL Executive Committee meeting in Dallas are available on the ARRL Web site, http://www.arrl.org/announce/ec_minutes_466.html

(Thanks-ARRL)

(Kachina continued from page 7)

prices," he said, "so if you are looking for a bargain, check there beginning May 25." Earnshaw said he'd like to thank everyone who purchased the 505DSP over the last several years. "I am sorry that we could not continue to manufacture the 505DSP, but we will do our best to continue to provide service to you in the future," he concluded.

Kachina Chief Engineer Doug Smith, KF6DX, said he's sad to see the product line come to an end. "Some might say that this is another blow to Amateur Radio, but I would say it is just an indicator of the need to adapt to changing conditions," he said. "The Amateur Radio Service should see several exciting developments in the coming years, including digital voice, high-speed digital modes, remote control and further improvements in so-called software-defined radios, to name a few."

Smith said some new ICs and other components now becoming available "will continue to fuel advancement of the state of the communications art."

Smith says he'll be moving on "to greener pastures," but will continue to edit QEX/Communications Quarterly for the ARRL. Sherman Leifer, W4FLA, owner of M&S Computer Products in Boonton, New Jersey, sold more 505DSPs than all other major US dealers combined. "I have found the 505DSP to be among the finest radios on the market," he said. "I got involved with the product because of its performance and because I saw tremendous possibilities for it."

Leifer said that "with all due respect" to Cameron Earnshaw, he thinks "many opportunities were missed and now may be lost" as a result of Kachina's decision.

(Thanks-ARRL)
